DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson et al. (GB 448,519) in view of Buchman et al. (US 5,020,302).

Robinson et al. disclose a machine for rolling up flexible articles and describes a method for its use. An article is inserted into receptacle 1 via a hollow cylindrical tube section having first and second openings; see figure 1. The first opening 5 is a cone with a flared section connected to the second narrower opening. The receptacle 1 is positioned over the second narrow opening of the tube and the rolled article is inserted through first flared opening 5, through second narrow opening, and into receptacle 1 in a predetermined orientation. The tube section is mounted stationary structure 2.

Robinson et al. do not directly disclose rotating the article during the insertion process into either the flared section or the tubular section. However, Buchman et al. directly teaches rotating a rolled item in a roll inserter while rotating the rolled item in a direction opposite the direction of the roll from the center spiraling outward during an inserting operation; see figure 1, column 3, lines 57-60. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include

the rotating of a rolled product as taught by Buchman et al. in the invention of Robinson et al. in order to assist in the insertion process.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
